Contemporary Methods in Treatment of Addicts (39557)	110
For all students, both undergraduate and graduate level (no ECTS)	113
Physical and Health Education	113

Instructions

Exchange students are students participating in a formal exchange programme between their home university and the University of Zagreb (i.e. Erasmus, Bilateral agreements, Erasmus Mundus etc.)

Croatian is the official language in the country and therefore most of the courses will be conducted in Croatian. Faculty of Education and Rehabilitation Sciences offers 3 study programs in Croatian.

UNDERGRADUATE LEVEL (3 YEARS):

- 1. Rehabilitation
- 2. Speech and Language Pathology
- 3. Social Pedagogy

GRADUATE LEVEL (2 YEARS):

- 1. Educational Rehabilitation
- 2. Speech and Language Pathology
- 3. Social Pedagogy
- Faculty of Education and Rehabilitation Sciences does not offer full degree study programs (undergraduate or graduate) in English language.
- Incoming students can spend semester or two in our institution and choose courses in English language.
- Incoming students can choose courses from the catalogue LIST OF COURSES published on Faculty's website. List is regularly updated.
- Incoming students should choose courses from the study program which is the most similar to the study program in their home institution.
- Courses in this catalogue are divided according to study level (undergraduate or graduate) and according to study program (Rehabilitation; Speech and Language Pathology; Social Pedagogy):
 - Undergraduate students can choose courses only from the undergraduate level
 - Graduate students can choose from both levels
- All courses have course descriptions and you should read them carefully to see if you meet the course enrolment requirements and entry competences required for the course. If you do not meet these requirements, we suggest that you choose another course.
- Courses in English available to incoming students are organized as individual consultations with the teachers. Teachers can include incoming students in the lectures with Croatian students or they can have individual consultations, it is up to the teacher.
- All courses are awarded with credits using the ECTS system.

Academic Calendar 2023. /2024.

2.10.2023. Monday	Start of winter semester
1.11.2023. Wednesday	All Saint's Day
18.11.2023. Saturday	Remembrance Day for the victims of the Homeland War
27.12.2023 5.1.2024.	Christmas Holidays (no classes)
6.1.2024. Saturday	Epiphany
26.1.2024. Friday	End of winter semester
29.1. – 23.2.2024.	Winter examination period (no classes)
26.2.2024. Monday	Start of summer semester
31.3.2024. Sunday	Easter
1.4.2024. Monday	Easter Monday
14.4.2024. Sunday	Day of the Faculty of Education and Rehabilitation Sciences University of Zagreb
1.5.2024. Wednesday	Labour Day
30.5.2024. Thursday	Statehood Day
30.5.2024. Thursday	Corpus Christi
7.6.2024. Friday	End of summer semester
10.6 5.7.2024.	Summer examination period (no classes)
22.6.2024. Saturday	Anti-Fascist Struggle Day
5.8.2024. Monday	Victory and Homeland Thanksgiving Day
15.8.2024. Thursday	Assumption of Mary
26.8. – 13.9.2024.	Autumn examination period (no classes)
EXPLANATION	National holidays, non-working days Classes Examination period Anniversaries and events

Course description for undergraduate study programme Rehabilitation

Planning Programme in Rehabilitation of Children and Youth with Intellectual Disabilities (144647)						
1. GENERAL INFORMATION						
1.1. Course teacher	Assis.Prof. Ljiljana Pintarić Mlinar, PhD	1.6. Year of the study programme/ semester (summer, winter)	3 rd / 5 th (winter)			
1.2. Name of the course	Planning Programme in Rehabilitation of Children and Youth with Intellectual Disabilities	1.7. Credits (ECTS)	4			
1.3. Associate teachers		1.8. Type of instruction (number of hours L+E+S+ e-learning)	30+15+15 + e-learning			
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate Rehabilitation	1.9. Expected enrolment in the course				
1.5. Status of the course	Obligatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	2			
2. COURSE DESCRIPTION						
2.1. Course objectives	Basic knowledge about goals and content of rehabi	litation program for children with intellectual dis	sabilities			
2.2. Course enrolment requirements and entry competences required for the course	Child psychology courses and passed exams Educational psychology/Pedagogy Preschool pedagogy	Educational psychology/Pedagogy				
2.3. Learning outcomes at the level of the programme to which the course contributes	Piaget's stages of cognitive development; human fu theory is concerned with the broad social environm		9 ,			

Planning Programme i	n Rehabilitation of C	hildr	en and You	ıth with Intellectual I	Disabilities (144647))		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)		neoretical foundations for rehabilitation program structuring; practical skills in needs' assessment; rehabilitation program activities oplication (under supervision of diploma level professional) focused on children with intellectual and developmental needs as well as their cial support						
2.5. Course content broken down in detail by weekly class schedule (syllabus)	Ecological; transactional act	evelopmental perspective in assessment and program planning; cological; transactional activity and curriculum-based assessment and intervention hases in Program development; Communication and Behavioral Patterns amily participation						
2.6. Format of instruction:			-		2.7. Comme	ents:		
2.8. Student responsibilities								
2.9. Screening student work (name	Class attendance	0,5	Research	1	Practical training	-

Assessment of Persons with Visual Impairment (131038)					
1. GENERAL INFORMATION					
1.1. Course teacher	Assoc. Prof. Sonja Alimović, PhD	1.6. Year of the study programme/ semester (summer, winter)	2 nd / 3 rd (winter)		
1.2. Name of the course	Assessment of Persons with Visual Impairments	1.7. Credits (ECTS)	3		
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+15+0		
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate study programme Rehabilitation	1.9. Expected enrolment in the course	10		
1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1		
2. COURSE DESCRIPTION					
2.1. Course objectives	To educate students about the main metho	ds, techniques and instruments used in the assessment	of the visually impaired.		
2.2. Course enrolment requirements and entry competences required for the course					
2.3. Learning outcomes at the level of the programme to which the course contributes	 Explain millstones of typical development of children Identify developmental discrepancies Identify the needs of children with disabilities for support according to education and rehabilitation assessment Apply education and rehabilitation procedures aimed at improving the overall development and functioning of children and persons with disabilities (all types and degrees of illness, injury and disorders; all levels of functioning and all age groups) within the individual (developmental) areas 				

Assessment of Persons wit	h Visual Impairment (131038)
	Judge critically on obtaining rights and taking responsibilities for participants involved in social inclusion of children and persons with disabilities
	6. Evaluate the ethical challenges of the field and represent a valid ethical principle
	7. Recognize and select scientifically valid and relevant facts
	8. Communicate ideas, problems and solutions from education and rehabilitation field to general population
	9. Evaluate the necessity of continuing professional and personal development
	10. Plan continuing education in professional and related professional areas
	1. Define and describe methods and techniques used in assessment of persons with visual impairment
	2. Identify and explain instruments used in assessment of persons with visual impairment
2.4. Learning outcomes expected at the level of the course (4 to 10 learning	3. Explain visual impairment influence on other developmental areas
outcomes)	4. Correlate assessment results to education and rehabilitation procedures
	5. Identify the importance and the purpose of the assessment in person with visual impairment in a context of rehabilitation program development
	1. Methods and techniques used in assessment of persons with visual impairment
	2. Visual impairments
	3. Influence and correlation of developmental areas in visual impairment
	4. Assessment instruments
	5. Early assessment in persons with visual impairment
2.5. Course content broken down in detail by weekly class schedule	6. Visual development (assessment and instruments)
(syllabus)	7. Social skills assessment in persons with visual impairment
·	8. Daily living skills assessment in persons with visual impairment
	9. Literacy assessment in persons with visual impairment
	10. Orientation and mobility assessment in persons with visual impairment
	11. Assessment of using assistive technology
	12. Assessment of school integration

Stimulating Perceptive-Motoric Abilities (131045)					
1. GENERAL INFORMATION					
1.1. Course teacher	Assis. Prof. Ljiljana Pintarić Mlinar, PhD	1.6. Year of the study programme/ semester (summer, winter)	3 rd / 6 th semester (summer)		
1.2. Name of the course	Stimulating Perceptive-Motoric Abilities	1.7. Credits (ECTS)	3		
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	15+30+0		
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate, Rehabilitation	1.9. Expected enrolment in the course	40		
1.5. Status of the course	optional	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)	1 10 %		
2. COURSE DESCRIPTION					
2.1. Course objectives		ents presented provide student with knowledge ab elementary rehabilitation in enhancing readiness fo			
2.2. Course enrolment requirements and entry competences required for the course	Basic knowledge /foundations in develop Assessment of children with disabilities	mental psychology			
2.3. Learning outcomes at the level of the programme to which the course contributes	use educational support and rehabilitation intervention in enhancing general development of children with developmental disabilities as well as their functional skills (referring to whole range of disabilities, levels of functioning, and age) how to describe and explain professional information, ideas, problems and solutions to public				
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	After theoretical and practical assignment - will obtain knowledge of fundamenta	ts obtained in course student al systems of perception (be able to list those)			

Stimulating Perceptive-Motoric	Abilities (131045)				
	- will know how perceptual modalities are connected to learning prerequisites				
	- will be able to explain / describe connectedness of perceptual experience and understanding of instructions; foundations of pre- school curricula requirements; with supervision of postgraduate professional in inclusive education and rehabilitation will be able to conduct sessions of programme of perceptual - motor stimulation primarily in work with children with mild to moderate /severe intellectual disabilities				
	- will gain knowledge on learning prerequisites and use those in creating perceptually based intervention for improvement of readiness for learning in children with mild cognitive delay				
	 will conduct (under supervision of postgraduate professional in inclusive education and rehabilitation) sessions for stimulation of development of specific perceptive modalities as complementary rehabilitation intervention necessary for making individualized and adjusted educational curriculum 				
	week 1, 2				
	Relatedness of school readiness and bio-pycho - social influences (cognitive development,				
	perceptual abilities, level of social adaptation, experience and interactions)				
	week 2				
	Perceptual experience, understanding - preference and attitude's development				
	week 3				
	perceptual abilities in spatial and temporal organization				
2.5. Course content broken down in detail by	weeks 4 - 12				
weekly class schedule (syllabus)	PERCEPTUAL MODALITIES AND functional skills				
	figure - ground differentiation				
	a) hand-eye coordination				
	b) sequencing and rhythm				
	c) visual memory, sequencing and rhythm				
	d) visual closure (ending)				
	e) perceiving spatial relations in two- and three-dimensional space				
	f) auditory perception (receiving sound from surrounding, interpretation, rhythm				

Stimulating Perceptive-Motoric	Abilities (13104	-5)				
	 g) tactile - kinaesthetic / proprioceptive perception (and related skills in stimulation of school readiness) h) taste, olfactory (naming, discrimination) WEEK 13 - 15 PERCEPTUALLY BASED intervention (structure of programme for improving perceptual - motor abilities)

Communication of Persons v	vith Visual Impairment (323	49)			
1. GENERAL INFORMATION					
1.1. Course teacher	Assoc. Prof. Sonja Alimović, PhD	1.6. Year of the study programme/ semester (summer, winter)	1 st / 2 nd (summer)		
1.2. Name of the course	Communication of Persons with Visual Impairments	1.7. Credits (ECTS)	3		
1.3. Associate teachers		1.8. Type of instruction (number of hours L + E + S + e-learning)	30+15+15		
1.4. Study programme (undergraduate, graduate, integrated)	Undergraduate, Rehabilitation	1.9. Expected enrolment in the course	25		
1.5. Status of the course	Elective	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)			
2. COUSE DESCRIPTION					
2.1. Course objectives	To introduce students in communication patterns development of children with visual impairment To make students aware of problems that visually impaired children have in the development of communication at an early age Introduce students to causes of early visual impairment and their impact on the overall development of a child, with an emphasis on the development of child's communication Introduce students to the possibilities of early (re)habilitation in order to stimulate the overall development, with a focus on socio-				
	emotional development and the development of communication at an early age To develop critical thinking skills and abilities to discuss the topics of the course				
2.2. Course enrolment requirements and entry competences required for the course	Student is supposed to have the basic knowledge from psychology.				

Communication of Persons wi	th Visual Impairment (32349)			
Learning outcomes at the level of the programme to which the course contributes	 Explain millstones of typical development of children Identify developmental discrepancies Explain developmental characteristics of children with disabilities Identify the needs of children with disabilities for support according to education and rehabilitation assessment Evaluate the ethical challenges of the field and represent valid ethical principles Recognize and select scientifically valid and relevant facts Communicate ideas, problems and solutions from education and rehabilitation field to general population Demonstrate professional cooperation skills Represent the attitude of respect for the diversity of children and persons with disabilities Evaluate the necessity of continuing professional and personal development 			
	 Plan continuing education in professional and related professional areas Demonstrate the skills of active learning and critical thinking 			
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	 Describe and give an example of a way the visual impairment is affecting communication. Identify and explain the basic causes and possible symptoms of visual impairment in childhood. Anticipate how visual impairment affects a child's development in other areas (motor skills, cognition, self-care, socialization). Identify developmental discrepancies in children with the visual impairment Explain developmental characteristics of children with visual impairments List, define and explain the methods of visual stimulation and their impact on developing functional vision at early age. Conclude how the child should be stimulated in order to reduce the negative impact of visual impairment on other developmental areas.

Course description for graduate study programme Educational Rehabilitation

In	ndividual education prog	rammes (39409)		
1. GE	NERAL INFORMATION			
1.1.	Course teacher	Prof. Zrinjka Stančić, PhD	1.6. Year of the study programme/ seme (summer, winter)	ester 2 nd / 3 rd (winter)
1.2.	Name of the course	Individual education programmes	1.7. Credits (ECTS)	5
1.3.	Associate teachers	Ana-Marija Bohaček, univ. spec. rehab. educ.	1.8. Type of instruction (number of hours L + E + S + e-learn	15+30+15 ning)
1.4.	Study programme (undergraduate, graduate, integrated)	Graduate, study programme Inclusive Education and Rehabilitation	1.9. Expected enrolment in the course	25
1.5.	Status of the course	obligatory	1.10. Level of application of e-learning (le 3), percentage of online instruction (20%)	
2. CC	DURSE DESCRIPTION			
2.1.	Course objectives	To enable students to offer quality supp	ort to teachers, pupils with disabilities and t	their parents
	Course enrolment requirements and entry competences required for the course	 appropriate knowledge of English appropriate knowledge of developmental psychology appropriate knowledge of teaching strategies 		
	Learning outcomes at the level of the programme to which the course contributes	Academic writing skills-student will be able to report and describe in short specific topic by using arguments and referencing literature and make critical reviews. Presentation-student will be able to present his/her work in front of the group, make presentation, differentiating main facts and make conclusions		

Individual education programmes (39409)					
	Personal competences-student will be able using all available sources in learning and developing, identify some of personal competencies and field of growth, integrating knowledge from different sources.				
	Student will be able to:				
	examine social context of school, classroom				
	observe, assess and describe educational needs of pupil(s) with SEN, in collaboration with teacher, SENCO and parent(s)				
2.4. Learning outcomes expected at the level of the course (4 to 10 learning	observe, assess and describe learning style of pupil(s) with SEN, in collaboration with teacher, SENCO and parents				
outcomes)	construct Individual Plan of Support, in collaboration with teacher, SENCO				
,	construct monthly IEP for one school subject (Math or Maternal language or Science)				
	recognize ethical challenges in inclusive classroom				
	provide support to teacher and pupil with SEN in the school surrounding (in the classroom, out of classroom)				
	Introduction to the course				
	Legislation point-to international inclusive education				
	Legislation point-to national inclusive education				
	School Centred Planning or Pupil Centred Planning				
	Three steps in creating IEP (assessment-plan of support-evaluation)				
	MAPS- Person Centred Planning for Pupils				
2.5. Course content broken down in	MAPS- Plan of active action – opinion of parent, teacher and pupil				
detail by weekly class schedule	MAPS - role play				
(syllabus)	The role of educational rehabilitator at inclusive school (guest lecturer)				
	Plan of support				
	Evaluation and grading (guest lecturer)				
	ICT and pupils with complex communication needs				
	Teaching Assistant- opinion of teacher, opinion of pupil				
	Mobile team and –experience of team				
	Valorisation of IEP

1.5. Status of the course	Mandatory	1.10. Level of application of e-learning (level 1, 2, 3), percentage of online instruction (max. 20%)			
2. COURSE DESCRIPTION					
2.1. Course objectives	Is to educate students about the most common causes of visual impairment and their influence on functional visual impairment. Is to enable students to gain knowledge of selected assessment tools, tests and techniques used in functional assessment. Is to educate students for planning, designing, and implementing a rehabilitation program for persons with visual impairment.				
2.2. Course enrolment requirements and entry competences required for the course	Student is supposed to have the basic knowled	edge about visual impairment and the causes of visual	impairment.		
2.3. Learning outcomes at the level of the programme to which the course contributes	 Compare different support systems for persons with disability Distinguish between different methods of scientific research Create social inclusion process enhancement procedures for persons with disability at all levels of ecological system Construct formal and informal procedures for assessing need satisfaction of a child or children with disability Modify education and rehabilitation procedures considering their efficacy 				

Functional Assessment in Per	son with Visual Impairment (39445)
	4. Create procedures contributing to equalization of opportunities for persons with disabilities
	5. Evaluate the effect of education and rehabilitation procedures
	6. Plan and implement scientific research based on ethical codes and principals of social usefulness
	7. Explain expert information and procedures to general population
	8. Develop cooperation with other experts, teams, organizations and systems
	9. Manage his/her own continuous professional and personal development
	10. Use learning techniques leading to formal and/or personal promotion in education and rehabilitation field of expertise
	 Relate basic knowledge about main structures, neurobiological development and physiology of the visual pathway to development of functional vision.
	2. Analyse correlation between visual pathway damage and functional visual impairment.
2.4. Learning outcomes expected at the level	3. Draw conclusions about severity of functional vision impairment based on knowledge about causes of vision loss
of the course (4 to 10 learning	4. Use the assessment tools and techniques in evaluation of functional vision.
outcomes)	5. Choose the best method of rehabilitation, based on assessment results.
	6. Write functional vision assessment report.
	7. Create and implement vision rehabilitation program.
	1. Visual functioning (visual functions and functional vision, the interrelation) (outcomes: 1-3)
	2. Visual function assessment tools and techniques (outcomes: 1-7)
	3. Functional vision assessment tools and techniques (outcomes: 4-7)
	4. Visual function tests (Lea tests, Teller, Cardiff and others) (outcomes: 2-6)
2.5. Course content broken down in detail by	5. Functional vision assessment (terminology, tools and techniques) (outcomes: 1 -4 and 6-9)
weekly class schedule (syllabus)	6. Procedures and objectives of functional vision assessment (outcomes: 1-9)
	7. The social and communication skills (as a field of functional vision assessment and selection of instruments - SSRS, application of the instrument, analysis of the results, recommendations for rehabilitation) (outcomes: 3-9)
	8. Daily living skills (as a field of functional vision assessment and selection, application and interpretation of instruments) (outcomes: 3-9)

Functional Assessment in Per	son with Visual Impairment (39445)	
	 Orientation and mobility (as a field of 10. Evaluation of school and community Assistive technology (outcomes: 3-9) Step by step (outcomes: 3-8) Lateralization tests (outcomes: 1-8) Tactile perception Test (outcomes: 3-15. Sensory integration in persons with version of the school of the s	8)	3-9)

2.1. Course objectives	with special emphasis on the role of the ne period. The accent will also be placed on the	gain knowledge about the aetiology and phenomend eurodevelopmental risk factors affecting developmen ne-various neurodevelopmental disorders such as per eurodevelopmental syndromes that might have a neg	t during prenatal, perinatal, and postnatal inatal brain lesions, epilepsy,
2.2. Course enrolment requirements and entry competences required for the course	Basic knowledge of the human anatomy and physiology, basic knowledge about the typical course of communication, speech, and language development.		
2.3. Learning outcomes at the level of the programme to which the course contributes	The course will contribute to the study of Speech and Language Pathology providing students with the basic knowledge and understanding of the role of different neurodevelopmental risk factor in the genesis of the language disorders as well as the ability to make the analysis and synthesis of all relevant medical data gathered through the process of the anamnestic assessment.		
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	 Explain and interpret basics of the explain and interpret basics. 	fessional terminology in the field of perinatology, ob- embryonal and foetal development as well as those o ment as well as to identify neurodevelopmental risk f ntal disorders that might lead to developmental lang	f brain development. actors relevant for the language

Neurodevelopmental Langua	age Disorders (130839)				
	 To define and to describe the impact of the epileptic changes and antiepileptic medications on language and language processing. Differentiate, describe and discus aetiology and symptomatology of different neurodevelopmental syndromes and malformations as well as their influence on language acquisition. Describe and differentiate the aetiology and pathophysiology of the childhood aphasia, and traumatic brain injury in children. Analyse obtained data and utilize it in the planning of general and specific procedures in speech therapy. 				
2.5. Course content broken down in detail by weekly class schedule (syllabus)	 Neurodevelopmental risk factors Neurodevelopmental disorders (terminology, aetiology, and pathogenesis of different neurodevelopmental disorders) Embryonal and foetal development. Brain development. Early neural development and signs of the disorders of neural origin. Different diagnostic methods for the structural and fun brain assessment in new-borns and small children. Impact of the prematurity and intrauterine growth retardation (IGR) on general developmental outcome and language acqui New-borns in the Neonatal Intensive care unit (NICU) – role of the mechanic ventilation, tracheostomy and gavage feeding i aetiology of communication, speech, and language disorders. Perinatal brain lesions (aetiology and types). Developmental outcomes in children with perinatal brain lesions (communication, speech, language, and cognitive developments. Hemispherectomy. Developmental brain plasticity. Epilepsy and epileptic syndromes as a risk factor in the speech, language, and cognitive development: course and outcomes. Neurodevelopmental syndromes. The impact of neurodevelopmental malformations and brain tumours on the language acquisition and occurrence of language disorders. Neurodevelopmental syndromes. The impact of neurodevelopmental malformations and brain tumours on the language acquisition and occurrence of language disorders. Traumatic brain injury in children. Childhood aphasia. 2nd Continual assessment 	iisition. in the ment).

2. COURSE DESCRIPTION

- 2.1. Course objectives
- 2.2. Course enrolment requirements and entry competences required for the course
- 2.3. Learning outcomes at the level of the programme to which the course contributes
- Learning outcomes expected at the level of the course (4 to 10 learning outcomes)

The goals of this course are: (1) to enable students to comprehend the importance of narrative abilities in language development, (2) to learn how to independently perform assessment of narrative abilities as a part of speech and language assessment, (2) to learn how to foster narrative abilities.

NA

After this course the student will be able to:

- List and describe the types of materials for narrative assessment
- List and describe levels of narrative assessment

Narrative Assessment in Speech and Language Pathology (39282)					
	 List, describe and apply assessment of the story macrostructure List, describe and apply assessment of the story microstructure Describe and recognise the elements of the cohesion and coherence in the story List and describe referential devices in the story Recognise elements of the evaluative function in narratives List basic devices for the fostering of narrative abilities

•	Course enrolment requirements and entry competences required for the course	-						

Theories of Prevention I (9388	83)
.3. Learning outcomes at the level of the programme to which the course contributes	Understanding and use of relevant theoretical approaches to the prevention of behaviour disorders and risky behaviour of children and youth.
	By the end of the course/module the student will be able to:
	- Use a recent terminology and conceptual definitions of prevention science
	- Critically judge historical facts and context of prevention
	- Select and defend arguments to advocate preventive practices and prevention research
2.4. Learning outcomes expected at the level of the course (4 to 10 learning outcomes)	- Demonstrate knowledge and understanding of different models of prevention
	- Connect levels and a continuum of risk with outcomes in child and youth behavior
	 Integrate lessons learned in the selection of prevention strategies, the level of prevention, models and prevention programs for children and youth in practice
	- Critically assess the level to which individual prevention programs belong
	- Integrate the various theoretical approaches underlying the understanding of the development of children and youth
	1. Introductory lecture / Definition of prevention and historical overview of the development of prevention
	2. The terms of the risk and risk behavior
	3. The terms mental health, positive mental health, the promotion of mental health
	4. Levels of preventive intervention and intervention models of prevention
	5. Levels of prevention interventions and environmental approach
.5. Course content broken down in detail by	6. Preventive approaches to internalized behavioural problems and effective programs
weekly class schedule (syllabus)	7. Preventive approaches to externalized behavioural problems and effective programs
	8. Theoretical foundations of prevention: the concept of risk and protective factors
	9. Theoretical foundations of prevention: the concept of development assets and the concept of positive developments
	10. Theoretical foundations of prevention: resilience
	11. Theoretical foundations of prevention: social and emotional learning
	12. Independent work on prepared materials
